With over 20 years on site experience SOTRES

is specialized in the water recycling process used

on the sand and quarries production site.

Washing and processing:

Concrete sand and industrial sand

Washing: Sand from sewer sludge and sand from dredging sludge

Water clarification by flocculation

Sludge pressing / Filter press

Bentonite sludge sand removal

Liquid solid separation

SOTRES designs and realises water recycling unit, adaptated for each production plant, after exploration in his laboratory of raw material samples or from customer's technical specifications

Designed respectfull of the environmental conditions, the *SOTRES* units offer high performances, with efficiency and fiability.

Constitued with standard elements - clarifier made of steel or concrete-flocculent conditioner-transfert pumpstation , the plants are perfectly adaptable for all applications required by manufacturers.

Mud cone concentration

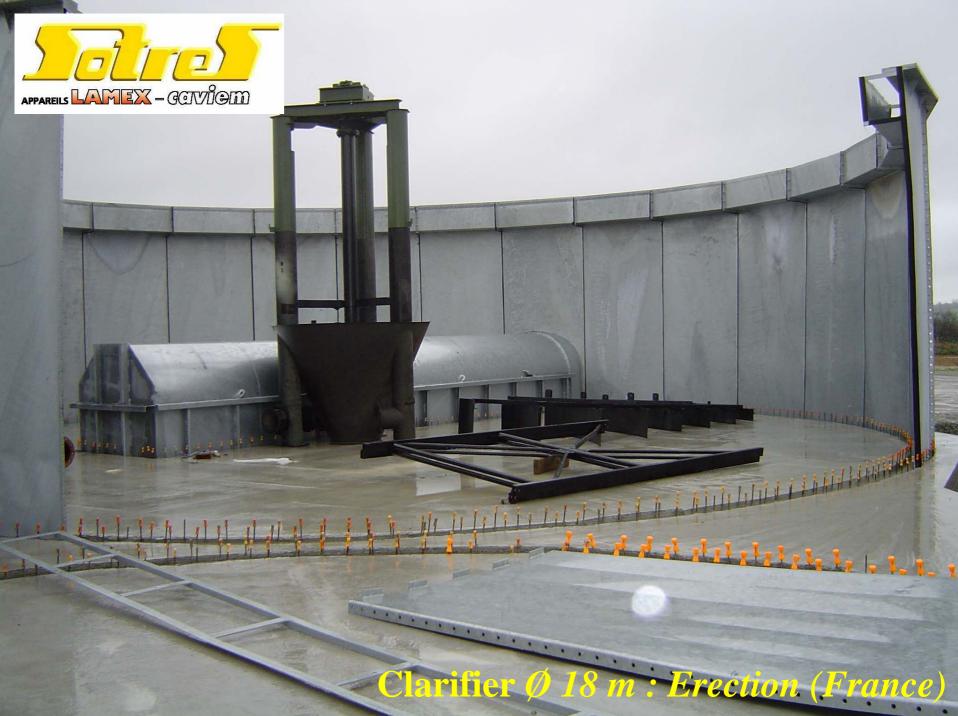

Rinsing water feeding in the central chamber

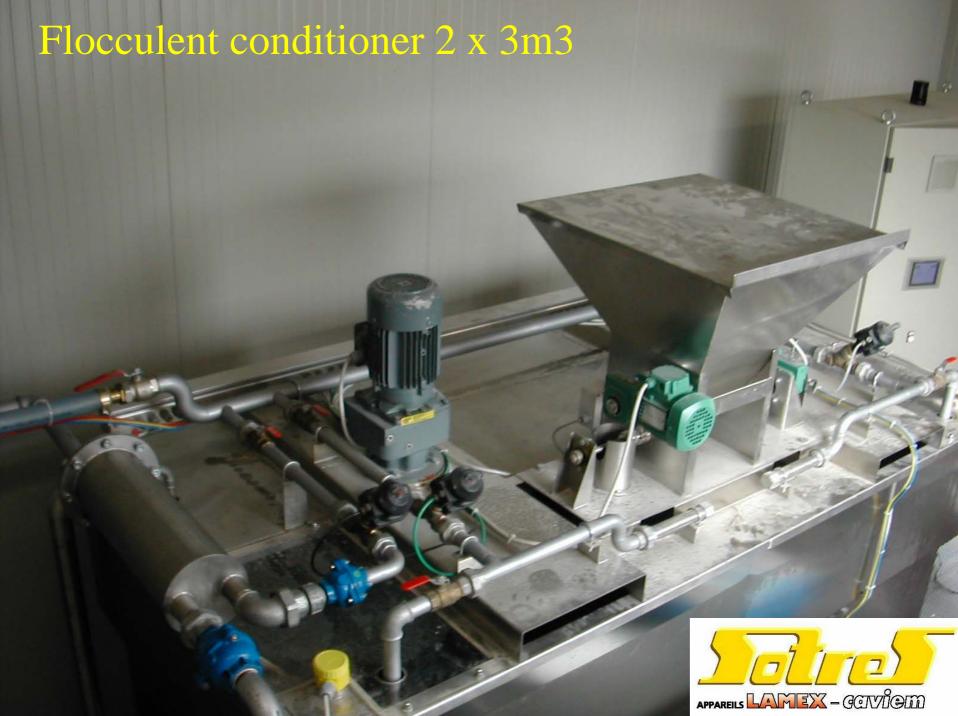

Decantation test system

Flocculent conditioner 1200L.

Powder hopper loading by big bag and transportation screw

Flocculent conditioner
2 x 4m3 with
powder hopper

powder hopper

Screw mud pump

Peristaltic mud pump

Clarifier 's mud output
